VROFFICEPLACE BIOMETRIC ACCESS CONTROL

SECURITY PACKED WITH EXPERIENCE

At VROfficePlace, we crafted some of the most advanced yet simple to integrate products. With Mission Critical in mind, we offer flexibility of using existing equipment without compromising security.

LET US INTRODUCE PULSLOGIC

PulsLogic is most advanced biometric access control in the industry based on real time video analysis, facial and voice recognition, available as Cloud service or on-premise installation.

PULSLOGIC is simple yet powerfull neural network powered access control system. It takes video feed life from your Surveillance Cameras, find a match against the defined persons and priviledges, performing a custom defined action.

Advanced features such as Integration with AD and various hardware controllers allows you to simplify your access control system based on person biometrics. As simple as that, PULSLOGIC can perform various operations from as door opening to computer login. Without a need for password, with absolute zero amount of false positives.

Moreover, it records all the activity with the timestamps allowing advanced analytics from employee time tracking to security audits. Furthermore, it can execute predefined commands, trigger an alerts and perform intrusion detection.

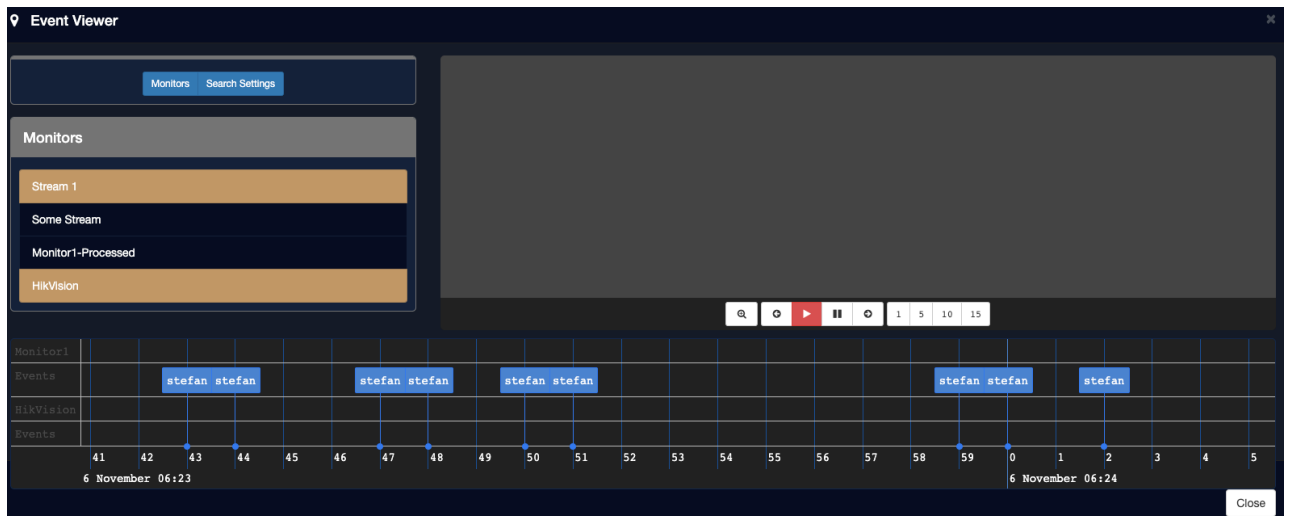

Unrecognized person in protected area? Yes, PULSLOGIC can even give you a call, text you or execute any other API call.

SIMPLE TO
OPERATE YET
POWERFUL

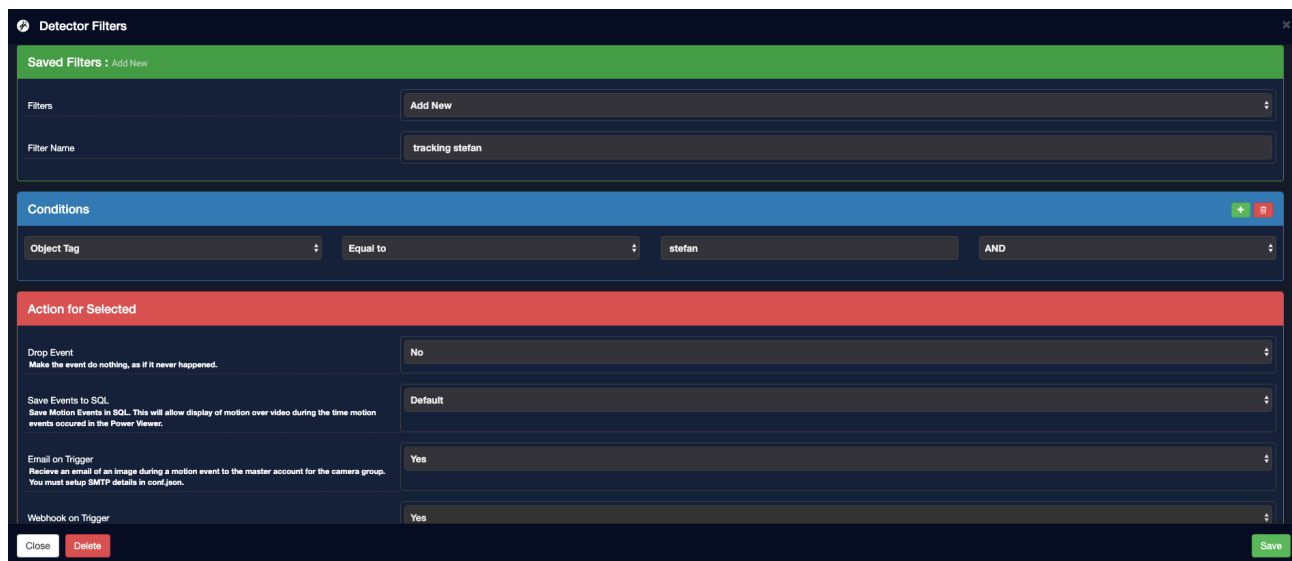

MEET OUR EVENT ENGINE

Full audit of captured events. Not only we can recognize person, we can recognize an object, licence plate, voice or noise.

You are in realtime control on events

Select cameras of your interest and replay or find specific timestamps. Review events or generate reports. From time tracking to people counters. Define patterns and action by person name, draw your zones, define alert states.
